

External Customer Data

External Customer Data is the beginning of the database entry. Customer first fills out entry forms on the External Calculator with data being saved to SharePoint when calculated. All data is connected by ID, Project Number, and Customer Identifier

- ID – Auto made when entry is made (int)
- Project Number – Assigned Project number by department. Will be assigned later when customer data is pulled than updated on internal screen (str).
- Customer Identifier – Identifier customer uses when filling out project input form. Something they can use to remember their budgets (str).
- Building – Building that budget calculation will take place at (str).
- Room Numbers – Rooms that budget calculation will take place at (str).
- Square Footage – Square Footage of room where renovation will take place (int).
- Description – A short description of renovation (str).
- Space Type – the type of space that the renovation is taking place examples are (office, classroom, lab) (str).
- Date – Date of when the budget calculation took place. Auto filled (date).
- Created By – Person who is signed into the calculator and does the calculation. Auto filled when calculations are made (str)
- Low (sqft) Construction – Low end price per square footage for construction only (float).
- Low (sqft) Soft Cost – Low end price per square footage for soft cost only (float).
- Low (sqft) Budget – Low end price per square footage for budget (float).
- High (sqft) Construction – High end price per square footage for construction only (float)
- High (sqft) Soft Cost – High end price per square footage for soft costs only (float).
- High (sqft) Budget – High end price per square footage for budget only (float)
- Low (100%) Budget – Low end of budget with 100% construction (float)
- High (100%) Budget – High end of budget with 100% construction (float)
- Low (75%) Budget – Low end of budget with 75% construction (float)
- High (75%) Budget – High end of budget with 75% construction (float)
- Low (50%) Budget – Low end of budget with 50% construction (float)
- High (50%) Budget – High end of budget with 50% construction (float)
- Min used – Min price per square footage per space type by TTU, THECB or National Average data
- Max Used - Max price per square footage per space type by TTU, THECB or National Average data

External Customer Scope

External Customer Scope is for systems related to the budget that can be saved. Systems are split into Architecture, Mechanical, Plumbing and Electrical (MPE), Soft Cost, and Additional Soft Cost. All data is connected by ID, Project Number, and Customer Identifier, and customer can choose to fill out at end but is not required.

- External ID – Saves from External Customer Data ID number when customer saves this data (int)
- Project Number – Assigned Project number by department. Will be assigned later when customer data is pulled than updated on internal screen (str).
- Customer Identifier – Identifier customer uses when filling out project input form. Something they can use to remember their budgets (str)
- Flooring – Covers replacement or upgrades of floor finishes such as carpet, tile, or LVT (str). Saved as yes, no, or maybe
- Ceiling - Work on ceiling tiles, grids, or overall ceiling finishes. Saved as yes, no, or maybe (str)
- Walls - Painting, wall repairs, or new wall surface finishes. Saved as yes, no, or maybe (str)
- Framing - Adding or modifying walls and structural framing. Saved as yes, no, or maybe (str)
- Access - Doors, locks, and security access systems. Saved as yes, no, or maybe (str)
- Millwork - Cabinets, countertops, and built-in furniture. Saved as yes, no, or maybe (str)
- Design - Architectural and engineering design services. In-house design is 6%, while outside design services are 15%. Saved as yes, no, or maybe (str)
- Ops Management - Project management and operational oversight costs, calculated at 4% of current project. Saved as yes, no, or maybe (str)
- Contingency - Allowance for unforeseen conditions or changes. Saved as yes, no, or maybe (str)
- Lighting - Upgrading or replacing lighting fixtures and controls Saved as yes, no, or maybe (str)
- Electrical - Modifying power systems, outlets, panels, or wiring. Saved as yes, no, or maybe (str)
- HVAC - Heating, ventilation, and air conditioning system upgrades. Saved as yes, no, or maybe (str)
- Exhaust - Existing exhaust or ventilation systems, including ductwork, fans, or exhaust equipment.
- Plumbing - Water, drainage, and piping system modifications. Saved as yes, no, or maybe (str)
- IT - Data, network cabling, and technology infrastructure. Saved as yes, no, or maybe (str)
- A/V - Audio/visual systems such as displays, speakers, and controls. Saved as yes, no, or maybe (str)
- FFE -Furniture, fixtures, and equipment not permanently installed. Saved as yes, no, or maybe (str)
- Asbestos - Testing, removal, or handling of hazardous materials. Add this if the building is older, has plaster walls, or may contain common asbestos-containing materials. Saved as yes, no, or maybe (str)
- Move Support - Costs related to relocating furniture, staff, or equipment Saved as yes, no, or maybe (str)

Internal Data

Internal Data for internal use only. Can be used to fill out new budgets, search customer records, search past budgets, and update budgets. All data is connected by ID, Project Number, and Customer Identifier

- External ID – Saves from External Customer Data ID number when customer data is pulled by ID or customer identifier then a project number is added
- Project Number – Assigned Project number by department. Will be assigned later when customer data is pulled than updated on internal screen (str).
- Customer Identifier – Identifier customer uses when filling out project input form. Something they can use to remember their budgets (str).
- Building – Building that budget calculation will take place at (str).
- Room Numbers – Rooms that budget calculation will take place at (str).
- Square Footage – Square Footage of room where renovation will take place (int).
- Description – A short description of renovation (str).
- Space Type – the type of space that the renovation is taking place examples are (office, classroom, lab) (str).
- Date – Date of when the budget calculation took place. Auto filled (date).
- Created By – Person who is signed into the calculator and does the calculation. Auto filled when calculations are made (str)
- Actual Total – Total of construction renovation after construction finishes
- Low (sqft) Construction – Low end price per square footage for construction only (float).
- Low (sqft) Soft Cost – Low end price per square footage for soft cost only (float).
- Low (sqft) Budget – Low end price per square footage for budget (float).
- High (sqft) Construction – High end price per square footage for construction only (float)
- High (sqft) Soft Cost – High end price per square footage for soft costs only (float).
- High (sqft) Budget – High end price per square footage for budget only (float)
- Low (100%) Budget – Low end of budget with 100% construction (float)
- High (100%) Budget – High end of budget with 100% construction (float)
- Low (75%) Budget – Low end of budget with 75% construction (float)
- High (75%) Budget – High end of budget with 75% construction (float)
- Low (50%) Budget – Low end of budget with 50% construction (float)
- High (50%) Budget – High end of budget with 50% construction (float)
- Min used – Min price per square footage per space type by TTU, THECB or National Average data
- Max Used - Max price per square footage per space type by TTU, THECB or National Average data

Internal Scope

Internal scope is for systems related to the budget that can be saved. Systems are split into Architecture, Mechanical, Plumbing and Electrical (MPE), Soft Cost, and Additional Soft Cost. All data is connected by ID, Project Number, and Customer Identifier. Split into percentage of 25, 50, 75, 100.

- External ID – Saves from External Customer Data ID number when customer saves this data (int)
- Project Number – Assigned Project number by department. Will be assigned later when customer data is pulled than updated on internal screen (str).
- Customer Identifier – Identifier customer uses when filling out project input form. Something they can use to remember their budgets (str)
- Flooring – Covers replacement or upgrades of floor finishes such as carpet, tile, or LVT (int).
- Ceiling - Work on ceiling tiles, grids, or overall ceiling finishes (int)
- Walls - Painting, wall repairs, or new wall surface finishes (int).
- Framing - Adding or modifying walls and structural framing (int).
- Access - Doors, locks, and security access systems (int).
- Millwork - Cabinets, countertops, and built-in furniture (int).
- Design - Architectural and engineering design services. In-house design is 6%, while outside design services are 15% (int).
- Ops Management - Project management and operational oversight costs, calculated at 4% of current project(int).
- Contingency - Allowance for unforeseen conditions or changes (int).
- Lighting - Upgrading or replacing lighting fixtures and controls (int).
- Electrical - Modifying power systems, outlets, panels, or wiring (int).
- HVAC - Heating, ventilation, and air conditioning system upgrades (int).
- Exhaust - Existing exhaust or ventilation systems, including ductwork, fans, or exhaust equipment (int).
- Plumbing - Water, drainage, and piping system modifications (int).
- IT - Data, network cabling, and technology infrastructure (int).
- A/V - Audio/visual systems such as displays, speakers, and controls (int).
- FFE -Furniture, fixtures, and equipment not permanently installed (int).
- Asbestos - Testing, removal, or handling of hazardous materials. Add this if the building is older, has plaster walls, or may contain common asbestos-containing materials (int).
- Move Support - Costs related to relocating furniture, staff, or equipment (int).
- Architecture Systems – Percent of total arch systems covering this budget (float)
- MPE systems – Percent of total MPE systems covering this budget (float)
- Soft Cost PCT – Percent of total soft cost systems covering this budget (float)
- Additional Soft Cost – Percent of total additional soft costs covering this budget (float)
